☒ Examiner's Statement of Reasons for Allowance

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance: The reasons for the allowability of all pending claims in this application have been established during the prosecution, and such reasons need not be repeated here verbatim. Although no interference has been formally declared, this application has been involved in procedural steps leading to the institution of an interference with U.S. Patent No. 5,433,651. In recent telephonic discussions with the Examiner, applicant's representative has indicated the desirability of removing the present application from any interference and allowing the application to issue with non-interfering claims. In addition to those claims which have been identified by the Examiner as **not** corresponding to the claims of U.S. Patent No. 5,433,651 and thus not subject to the proposed interference (i.e. claims 17-35, 39-47, and 53-60), the Examiner and applicant's representative have agreed upon the entry of claims which are similar to claims that would have been subject to the proposed interference but which include a limitation that makes them patentably distinct from U.S. Patent No. 5,433,651. That limitation is the inclusion of interferometric detection (means and process steps). The apparatus and process of U.S. Patent No. 5,433,651 cannot employ interferometric detection, the detection therein being a light intensity detection scheme. Previously pending claims 76-78 also recite this limitation and, upon reconsideration, such claims would likewise **not** have been subject to the proposed interference. All claims which would have been subject to the proposed interference have been cancelled and have been resubmitted in a recently filed divisional application so that an interference with U.S. Patent No. 5,433,651 will ultimately take place. Since all pending claims in the present application (i.e. claims 17-35, 39-47, 53-60, 76-78, and 91-151) are patentably distinct from U.S. Patent No. 5,433,651 and

all other prior art of record, the claims are allowed. In accordance with MPEP § 1302.01, these pending claims have been renumbered so that they will appear as claims 1-100 in the printed patent.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning the merits of this communication should be directed to Examiner John D. Lee at telephone number (703) 308-4886. Any inquiry of a general or clerical nature (i.e. a request for a missing form or paper, etc.) should be directed to the Technology Center 2800 receptionist at telephone number (703) 308-0956 or to the technical support staff supervisor at telephone number (703) 308-4854.
